

Henok Tekeba

me@enoch.et | enoch.et | Addis Ababa, Ethiopia

EDUCATION

B.Sc. Electrical and Computer Engineering

2023 – 2028

Addis Ababa University, Ethiopia

EXPERIENCE

Founder & Full-Stack Engineer

2024 – Present

voiET — Amharic Voice AI Platform

- Built and shipped a full-stack voice AI platform end to end: Next.js frontend, Express REST API, PostgreSQL database, deployed across Vercel, Railway, and Modal Labs
- Implemented JWT authentication, Server-Sent Events for real-time streaming responses, and parallel audio chunking using Modal's starmap for high-throughput inference
- Fine-tuned OpenAI Whisper Medium on 38K+ Amharic audio samples (Google WAXAL dataset) for low-resource language ASR
- Converted fine-tuned model to ONNX format for optimized CPU inference; reduced latency for serverless cold-start environments
- Built and deployed a production diarization + ASR pipeline using pyannote and faster-whisper on Modal, delivering annotated and timestamped output for a paid transcription contract (~30,000 audio chunks)

Full-Stack Engineer

2024

goHa.et — Ethiopian AI Ecosystem Tracker

- Designed and shipped a full-stack product from zero to production in a single day: Next.js + Express, automated GitHub Actions cron job for live data updates, deployed on Vercel and Render
- Architected a living data pipeline that continuously tracks and surfaces the Ethiopian AI ecosystem without manual intervention

Automation Engineer

2024

Personal — Telegram Opportunity Digest

- Built an automated Telegram channel pipeline using Telethon + Groq (llama-3.3-70b-versatile) to scrape, summarize, and deliver curated opportunities
- Deployed via GitHub Actions cron; zero-maintenance system running continuously in production

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, Java, SQL

Frontend: Next.js, React

Backend: Express.js, REST APIs, JWT Auth, Server-Sent Events, PostgreSQL

ML/AI: Hugging Face Transformers, Whisper, faster-whisper, pyannote, ONNX, Modal Labs

Infrastructure: Vercel, Railway, Render, Modal Labs, Cloudflare, GitHub Actions CI/CD
